The second edition was published in 1992 and reprinted in 2002 and 2011. In this book, Professor Tylecote presents a unique introduction to the history of metalurgia from the earliest times to the present. The development of metal skills and techniques of different civilizations, and the connection between them, are carefully leashed. This volume is concerned with important topics such as the rise of metallurgy in the Near East and the Industrial Revolution in Western Europe.
